COMMENTS

The Brother LC-47 is a black and colour sponge less cartridge which is extremely easy to refill and very reliable.

REQUIREMENTS

- ♦ 20 ml Appropriate Black or colour ink.
- ♦ 20 ml syringe with sharp needle
- ♦ Sealing tape to seal the ink port while refilling.
- ♦ 4mm drill (optional)
- ♦ Reusable Plug to seal the 4 mm hole after refilling (optional)

REFILLING METHOD

STEP 1.

Remove the cartridge from the printer. Place sealing tape over the ink port (see above drawing)

STEP 2.

Using the Ausjet drill tool make an opening in the side of the cartridge as shown above. (option 2 is to drill a 4 mm hole and use a reusable plug to fill the hole).

STEP 3.

Fill syringe with 20 ml ink and insert the syringe through the hole into the cartridge about 10mm. Inject ink slowly into the Cartridge making sure the ink doesn't fill above the ink level indicated above (the bottom of the label).

STEP 4.

Remove syringe and wipe of any excess ink with some tissues. Seal the refilling hole using tape or hot melt glue. with the reusable plug.

STEP 5.

Only remove the tape from the ink port when you are ready to place the cartridge into the printer. Run some cleaning cycles and test prints.
